

We are looking for a:

MAINTENANCE TOOLING TECHNICIAN

As we are extending our products and open a new factory, we are also extending our team and look for a **Maintenance Tooling Technician** to join us.

Your Mission:

A Tooling Technician's main mission is to ensure that the tools and equipment used in production are in optimal condition and meet the required specifications and standards. This person must possess the knowledge, skills, and ability to troubleshoot and repair tooling and equipment issues with minimal guidance or supervision.

You will be responsible for the following tasks:

- Performing regular electrical and mechanical maintenance and inspections on tools and buildings.
- Testing and calibrating the tools and equipment and documenting their work.
- Perform preventive and corrective maintenance on tools and production equipment.
- Perform daily monitoring, preventive and corrective maintenance on production and utility equipment.
- Plan and perform any task required to program, fabricate, maintain, inspect, and/or repair different types of tools.
- Understand tool and engineering drawings and models, sketches, templates, tool design manuals, verbal information or production parts in accomplishing and communicating work requirements.
- Able to provide simple report on breakdown history and ensure action follow up to prevent recurrence of tool breakdowns.
- Support the Maintenance Manager in the identification and procurement of parts required for maintenance and repair.
- Keep track of spare part and inventory usage to maintain spare part/inventory control.
- Provide feedback and give suggestions to improve tools/equipment stability and performance.
- designing and fabricating new tools, modifying and improving existing ones.
- Assist Engineers in carrying out engineering evaluations/experiments/ troubleshooting.

Your profile:

- Highschool degree.
- Minimum of 2 years' experience in a similar position.
- Very good mechanical and electrical knowledge.
- Basic knowledge of English language.
- Industrial maintenance knowledge.
- Able to work with various types of tools, such as dies, molds, jigs, gauges, cutting tools etc.
- Knowledge of processes such as cutting, grinding, spotting, shaping, bending, drilling etc.
- Planning and organizing abilities.
- Basic knowledge in Microsoft Office.

We offer more than a job! What you'll will find here? Take a look:

- Interesting and challenging position in the aerospace industry;
- Various opportunities for personal and professional development, training and continuous learning;
- A permanent position in a company with a strong corporate identity and purpose;
- Great company culture in a young and dynamic team.
