

We are looking for a:

MANUFACTURING ENGINEER COMPOSITES BONDING

As we are extending our products and opening a new factory, we are also developing our team and look for a **Manufacturing Engineer – composites and Bonding** to join us.

Your Mission:

The Manufacturing Engineer enables the production team to achieve the required production rates with the right quality. This role is also responsible for the development, implementation, and continuous improvement of manufacturing processes and procedures.

You will be responsible for the following tasks:

- Tracking and improving quality in the Composites and Bonding production line.
- Oversee and ensure the efficient production of high-quality parts.
- Develop production procedures and processes and ensure they are accurately and clearly documented to allow repeatable and reliable manufacturing.
- Monitoring and following the key characteristics of the production line.
- Carrying out GEMBA audits and identifying opportunities for improvement.
- Applying Lean Manufacturing standards to make the production line more efficient.
- Investigating the root cause of realized production and quality issues in the production line.
- Defining the necessary tools needed in the line.
- Industrialization of new products and transfer of work in the composites and bonding lines.

Your profile:

- Material Science/Chemist engineering diploma, or equivalent experience.
- 3 to 5 years of seniority in a similar role.
- Hands on attitude and adaptability to schedules from production.
- Autonomous, responsive, results and details oriented.
- Advance English skills, French is a plus.
- Ease to use the tools of the Office suite.
- Good capacity for synthesis and analysis.
- Good communication skills and easy work in team.
- Proven experience of problem-solving techniques (PDCA, 6M, 8D, etc.).
- Previous experience in greenfield projects, transfer of work or industrialization is a big plus.

We offer more than a job! What you'll will find here? Take a look:

- Interesting and challenging position in the aerospace industry.
- Various opportunities for personal and professional development, training and continuous learning.
- A permanent position in a company with a strong corporate identity and purpose.
- Great company culture in a young and dynamic team.
